MEMORANDUM

JULY 13, 2005
6:00 – 7:00 P.M.

BOARD WORKSHOP

**STUDENT SUPPORT SERVICES BUILDING
ARCHITECTURAL CONCEPTS**

Representatives from TBP Architects will conduct a workshop on their architectural concepts for the new Student Support Services Building. They will present a 3D model so they can illustrate effectively how the building will connect to other buildings on the core campus. The architects will share proposed floor plans and building elevations. They will provide drawings which will depict the actual exterior appearance of the planned building. Furthermore, the architects will define the building's footprint and explain how the building will integrate with the campus' current roadways, sidewalks and parking lots.

The purpose of the workshop will be for the Board of Trustees to consider the architectural concepts proposed by the architects and to provide the architects feedback on these concepts. The Board of Trustees will be requested to approve the initial preliminary design phase documents for the Student Support Services Building at the August 10, 2005 Board meeting. These documents will also include projected construction costs.
