EXHIBIT “A”
DESCRIPTION OF SERVICES TO BE PERFORMED BY CONSULTANT

Consultant’s entire Proposal is made part of this Agreement.

The scope of services for this project will consist of providing geologic hazards evaluation, suggested footing design and necessary CGS report for submission to the DSA. This will include the following:

1. Review existing geotechnical and geologic information.
2. Review geologic hazard data, including Fugro’s December 21, 2009 report, site visit, and update geologic hazards evaluation by CEG.
3. Perform geotechnical engineering analyses, including footing capacity (bearing and lateral capacity) analyses as appropriate. Develop geotechnical engineering and foundation design recommendations. Prepare a geotechnical study report for the proposed improvements (Building 9 Elevator).
