It was easy to miss the total lunar eclipse last week, as the total eclipse did not occur until 3:21 a.m. Oct. 8. According to the Ohlone Astrophysics club, however, you still have an opportunity to see another one of the coolest and closest cosmic phenomena.

A partial solar eclipse will be visible from the Fremont/Newark area beginning about 2 p.m., and reaching its maximum eclipse about 3:15 p.m. The moon will blot out a little more than 50 percent of the sun at the point of maximum eclipse.

Alyssa Proudfoot, president of the club, said it is hosting a free viewing party at both campuses. Students and members of the public are invited to come to the Fremont campus quad or the Newark campus courtyard to learn about the eclipse. The tables will be set up from 11:30 a.m. to 3 p.m.

The astrophysics club will provide solar glasses and professional telescopes with solar filters, allowing attendees to directly observe the eclipse, Proudfoot said.
