BROADCASTING: ADVANCED FILM AND VIDEO

This certificate shows that a student has successfully completed a sequence of classes and developed specific skills necessary to pursue a career in commercial film or video production.

Student Learning Outcomes

1. Create and execute specific lighting designs for subjects and identify and operate a variety of lighting instruments.
2. Conceive, storyboard, and shoot a video of at least three minutes in length.
3. Incorporate video graphics from a Photoshop file.
4. Construct a video editing timeline, and arrange individual scenes into a sequence, using transitions, split edits, and match frame editing.
5. Manipulate audio tracks to combine the spoken word with music, and mix and calibrate audio tracks.
