Futuris Public Entity Investment Trust
Fremont, California

Report on the Financial Statements

We have audited the accompanying financial statements of Ohlone Community College District Futuris Public Entity Investment Trust (the OPEB Trust), as of and for the year ended June 30, 2017, and related notes to the financial statements, which collectively compromise the OPEB Trust’s basic financial statements as listed in the table of contents.

Management’s Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor’s Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity’s preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.
Members of the Board of Trustees  
Ohlone Community College District  
Retirement Futuris Public Entity Investment Trust

**Opinion**

In our opinion, the financial statements referred to above present fairly, in all material respects, the fiduciary net position of the OPEB Trust as of June 30, 2017, and the changes in fiduciary net position for the year then ended in accordance with accounting principles generally accepted in the United States of America.

**Change in Accounting Principle**

As described in Note 2, the OPEB Trust adopted the provisions of Governmental Accounting Standards Board (GASB) Statement No. 74, *Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans*. Our opinion is not modified with respect to this matter.

**Other Matters**

**Required Supplementary Information**

Accounting principles generally accepted in the United States of America require that the Management’s Discussion and Analysis, Schedule of Changes in the District’s Net OPEB Liability and Related Ratios and the Schedule of Investment Returns be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management’s responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

GILBERT ASSOCIATES, INC.  
Sacramento, California  
November 29, 2017
The Ohlone Community College District (District) administers a single-employer defined benefit healthcare plan (the Plan). The District, through its authorized Retirement Board of Authority (RBOA), established the Futuris Public Entity Investment Trust (OPEB Trust). The RBOA was established to manage, direct and control the OPEB Trust. This section provides an overview and analysis of the financial activities of OPEB Trust for the fiscal year ended June 30, 2017. The OPEB Trust was established in June 2009 by the Governing Board of the District. The District provides benefits on a pay-as-you-go basis, and also makes contributions to the OPEB Trust. We encourage readers to consider the information presented here in conjunction with additional information that we have furnished in our financial statements.

OVERVIEW OF THE FINANCIAL STATEMENTS

The accompanying financial statements have been prepared in conformity with generally accepted accounting principles as prescribed by the Governmental Accounting Standards Board (GASB) and Audits of State and Local Governmental Units, issued by the American Institute of Certified Public Accountants (AICPA). The OPEB Trust reports as an other employee benefit trust fund, which reports resources required to be held in a fiduciary capacity for the members of the Plan.

The following discussion and analysis are intended to serve as an introduction to the OPEB Trust's financial statements, which comprises these components:

1. Statement of Fiduciary Net Position
2. Statement of Changes in Fiduciary Net Position
3. Notes to Financial Statements

The Statement of Fiduciary Net Position is a snapshot of account balances at year-end. It indicates the assets available for future payments and any current liabilities that are owed at this time.

The Statement of Changes in Fiduciary Net Position, on the other hand, provides a view of current year additions to and deductions from the OPEB Trust.

The Statement of Trust Net Position and the Statement of Changes in Trust Net Position report information about the OPEB Trust's activities. These statements include all assets and liabilities, using the full accrual basis of accounting, which is similar to the accounting used by most private sector companies.

These two statements report the OPEB Trust's net position held in an irrevocable trust account for retirees' medical benefits. Net position, the difference between assets and liabilities, is one way to measure the OPEB Trust's financial position. Over time, increases and decreases in net position is one indicator of whether the OPEB Trust's financial health is improving or deteriorating. Other factors, such as market conditions, should also be considered in measuring the OPEB Trust's overall health.

Notes to Financial Statements provide additional information that is essential to a full understanding of the data provided in the financial statements.
FINANCIAL HIGHLIGHTS

The net position of the OPEB Trust at June 30, 2017 was $4,272,092. Net position is restricted for OPEB.

The investment policy was adopted for use by RBOA in order to, among other things, assist the District in meeting applicable funding requirements for the payment of future retiree health and welfare obligations and other post-employment benefits (OPEB). It is the policy to use a broad range of investment choices that have distinctively different risk and return characteristics.

The District provides benefits on a pay-as-you-go basis, and also makes contributions to the OPEB Trust. The contribution requirements of plan members and the District are established and may be amended by the Board and by contractual agreement with employee groups. The District’s plan members are not required to contribute to the plan. During the year ended June 30, 2017, the District contributed $348,326 to the OPEB Trust. The District’s benefit payments on a pay-as-you-go basis during the year ended June 30, 2017 were $303,199, which were not reimbursed by the OPEB Trust.

In June 2015, GASB released new accounting standards, GASB statements 74 and 75, for public sector postretirement benefit programs and the employers that sponsor them. GASB statements 74 and 75 reflect a fundamental overhaul in the standards for accounting and financial reporting for OPEB. They replace GASB statements 43 and 45.

The financial statements of the OPEB Trust include the Plan’s fiduciary net position because the resources of the Plan are held in a fiduciary capacity for the members of the Plan. The District’s net OPEB liability, under GASB 75, will be included in the District’s June 30, 2018 financial statements.

The components of the net OPEB liability of the District at June 30, 2017, were as follows:

<table>
<thead>
<tr>
<th>Description</th>

</tr>
</tbody>
</table>

Plan fiduciary net position as a percentage of the total OPEB liability 75.25%
FINANCIAL ANALYSIS

As previously noted, net position may serve over time as a useful indication of the OPEB Trust's financial position. The assets of the OPEB Trust exceeded its liabilities at June 30, 2017 as follows:

**ASSETS**
- Cash and deposits $9,722
- Investments $4,272,092
- Total assets $4,281,814

**LIABILITIES**
- Due to broker for investments purchased 9,722
- Net position restricted for postemployment benefits other than pensions $4,272,092

The changes to OPEB Trust’s net position for the fiscal year ended June 30, 2017 is as follows:

**ADDITIONS**
- Employer contributions $348,326
- Investment income 348,287
- NET INCREASE IN NET POSITION 696,613

**NET POSITION RESTRICTED FOR POSTEMPLOYMENT BENEFITS OTHER THAN PENSIONS**
- NET POSITION, Beginning of Year 3,575,479
- NET POSITION, End of Year $4,272,092

1. PLAN DESCRIPTION

Plan Administration

The Ohlone Community College District (District) administers a single-employer defined benefit healthcare plan (the Plan). The District, through its authorized Retirement Board of Authority (RBOA), established the Futuris Public Entity Investment Trust (OPEB Trust). The RBOA was established to manage, direct and control the OPEB Trust. The number of RBOA members consists of such number of individuals that are deemed necessary by the Board of Trustees of the District. The RBOA appointed the Benefit Trust Company (BTC) to serve as the Discretionary Trustee and OPEB Trust Custodian. The OPEB Trust is used for the purposes of investment and disbursement of funds irrevocably designated by the District to fund future other post-employment benefits (OPEB).

Plan Membership

At June 30, 2017, the Plan membership consisted of the following:

- Inactive employees receiving benefits: 59
- Inactive employees entitled to but not receiving benefits: 0
- Participating active employees: 330
- Total: 389

Benefits Provided

The District’s benefits provided to retirees are based on Government Code sections collectively known as Public Employees' Medical & Hospital Care Act (PHMHCA), which vary among different collective bargaining agreements. The following is a description of the current retiree benefit plan.

Contributions

The District provides benefits on a pay-as-you-go basis, and also makes contributions to the OPEB Trust. The contribution requirements of plan members and the District are established and may be amended by the Board and by contractual agreement with employee groups. The District’s plan members are not required to contribute to the plan.
2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation – The accompanying financial statements have been prepared in conformity with generally accepted accounting principles as prescribed by the Governmental Accounting Standards Board (GASB) and Audits of State and Local Governmental Units, issued by the American Institute of Certified Public Accountants (AICPA). The OPEB Trust reports as an other employee benefit trust fund, which reports resources required to be held in a fiduciary capacity for the members of the Plan.

Basis of Accounting – The accompanying financial statements have been presented using the economic resources measurement focus and accrual basis of accounting. Under the accrual basis, revenues are recognized when earned, and expenses are recognized when an obligation has been incurred.

Investments – Investments are reported at fair value.

Estimates Used in Financial Reporting – In preparing financial statements in conformity with accounting principles generally accepted in the United States of America, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and revenues and expenses during the reporting period. Actual results could differ from those estimates.

New Pronouncements – For the year ended June 30, 2017, the Plan implemented GASB Statement 74 (GASB 74), Financial Reporting for Postemployment Benefit Plans Other Than Pensions Plans. The primary objective of GASB 74 is to improve the usefulness of information about OPEB included in the general purpose external financial reports of state and local government OPEN plans for making decisions and assessing accountability.

3. INVESTMENTS

Fair Value Measurement

The framework for measuring fair value provides a fair value hierarchy that categorizes the inputs to valuation techniques used to measure fair value into three levels. Level 1 inputs are quoted prices in active markets for identical assets or liabilities. Level 2 inputs are inputs rather than quoted prices included within Level 1, which are observable for the asset or liability, either directly or indirectly. Level 3 inputs are unobservable inputs. Open-ended Mutual funds are classified as Level 1 of the fair value hierarchy because they are valued using quoted prices in active markets for identical assets.

Rate of Return

For the fiscal year ended June 30, 2017, the annual money-weighted rate of return on investments was 9.97% percent. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for changing amounts actually invested.
Investments Authorized by the Investment Policy

The following table identifies the investment types authorized by the OPEB Trust’s investment policy. The investment policy was adopted for use by RBOA in order to, among other things, assist the District in meeting applicable funding requirements for the payment of future retiree health and welfare obligations and other post-employment benefits (OPEB). It is the policy to use a broad range of investment choices that have distinctively different risk and return characteristics. Not more than 5% of the Trust assets should be invested in any single equity security issue or issuer, with the exceptions of: a single diversified mutual fund, obligations of the U.S Government and its agencies, and U.S. agency mortgage-backed pass-through securities or a mutual fund that invests in such obligations or securities. The RBOA envisions that BTC will invest predominately in open and closed-ended mutual funds.

Authorized Investment Types

**Equity investments:**
- Publicly traded common stocks, preferred stocks, securities convertible into common stocks, and securities which carry the right to buy common stocks, listed on a major United States stock exchange, including stocks traded through the NASDAQ Stock Market;¹
- American Depository Receipts;
- SEC-registered open-ended mutual funds and Bank, Insurance Company or Trust Company commingled funds which invest primarily in stocks and other instruments;²
- Closed-end SEC-registered mutual funds which invest primarily in stocks and other instruments²;
- Exchange Traded Funds (ETFs) which invest primarily in stocks and other instruments²;

**Fixed income investments:**
- Obligations of the U.S. Government and its agencies;
- Bonds issued by U.S Corporations or U.S. subsidiaries of foreign companies that are incorporated with the U.S and carry a minimum BBB rating;
- Certificates of Deposit issued by banks or savings and loans of sound financial condition under FDIC management, with never more than $100,000 (including interest) in any single institution;
- SEC-registered open-end mutual funds and Bank, Insurance Company and Trust Company commingled funds which invest primarily in bonds and other instruments²;
- Closed-end SEC registered mutual funds which invest primarily in bonds and other instruments²;
- Exchange Traded Funds ("ETFs") which invest primarily in bonds and other instruments²;
- Investment grade foreign government or corporate bonds carrying a minimum BBB rating, whether or not denominated in U.S currency, and whether or not hedged for foreign currency risk;
- Asset-backed Securities, provided that these securities have been registered with the SEC for public offering and that they meet the requirements of these policies and objectives and carry a minimum BBB rating; and
- US Agency mortgage-backed pass-through securities.

¹ may not be held directly; but only in open-end or closed-end mutual funds, commingled funds or ETFs.
² which are allowable securities under the policies and objectives of the investment policy.
Custodial Credit Risk

Custodial credit risk for deposits is the risk that, in the event of the failure of a depository financial institution, a government will not be able to recover its deposits or will not be able to recover collateral securities that are in the possession of an outside party.

The custodial credit risk for investments is the risk that, in the event of the failure of the counterparty (e.g., broker-dealer) to a transaction, a government will not be able to recover the value of its investment or collateral securities that are in the possession of another party. The Plan’s investment policy does not contain legal or policy requirements that would limit the exposure to custodial credit risk for deposits or investments. The OPEB Trust’s investment securities are not exposed to custodial credit risk because all securities are held by OPEB Trust’s custodian bank in the District’s name.

Credit Risk

Generally, credit risk is the risk that an issuer of an investment will not fulfill its obligation to the holder of the investment. This is measured by the assignment of a rating by a nationally recognized statistical rating organization. The OPEB Trust’s investments in open-ended mutual funds do not have a rating provided by a nationally recognized statistical rating organization.

Interest Rate Risk

Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment, the greater the sensitivity of its fair values to changes in market interest rates.

The schedule of maturities of investments subject to interest rate risk at June 30, 2017 is as follows:

<table>
<thead>
<tr>
<th>Investment Type</th>
<th>Fair Value</th>

4. NET OPEB LIABILITY OF THE DISTRICT

The components of the net OPEB liability of the District at June 30, 2017, were as follows:

<table>
<thead>
<tr>
<th>Component</th>
<th>Fair Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total OPEB liability</td>
<td>$5,677,289</td>
</tr>
<tr>
<td>Plan fiduciary net position</td>
<td>$4,272,092</td>
</tr>
<tr>
<td>District net OPEB liability</td>
<td>$1,405,197</td>
</tr>
</tbody>
</table>

Plan fiduciary net position as a percentage of the total OPEB liability: 75.25%
Actuarial Assumptions

For the measurement period ended June 30, 2016 (the measurement date), the beginning total OPEB liability was determined by rolling back the June 30, 2016 total OPEB liability. The June 30, 2016 total OPEB liability amounts were based on the following actuarial methods and assumptions:

<table>
<thead>
<tr>
<th>Actuarial Assumptions</th>
<th>Entry-Age Normal</th>
</tr>
</thead>
<tbody>
<tr>
<td>Discount Rate</td>
<td>6.00%</td>
</tr>
<tr>
<td>Inflation</td>
<td>2.75%</td>
</tr>
<tr>

<tr>
<td>Mortality - Certificated(4)</td>
<td>CalSTRS’ Membership Data</td>
</tr>
<tr>
<td>Health care cost trend rates</td>
<td>4.00%</td>
</tr>
</tbody>
</table>

(1) Since benefits do not depend on salary, using an aggregate payroll assumption for purposes of calculating the service costs results in negligible error.
(2) Net of OPEB plan investment expense; includes inflation
(3) The mortality table used was developed based on CalPERS-specific data. The table includes 20 years of mortality improvements using Society of Actuaries Scale BB. For more details on this table, refer to the April 2014 experience study report.
(4) CalSTRS uses custom mortality tables to best fit the patterns of mortality among its members. These custom tables are based on RP2000 series tables adjusted to fit CalSTRS experience. RP2000 series tables are adjusted to fit CalSTRS specific experience through June 30, 2015. See CalSTRS July 1, 2006 – June 30, 2010 Experience Analysis and June 30, 2015 Actuary Program Valuations for more information.

The long-term expected rate of return on OPEB plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of the OPEB plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighing the expected future real rates of return by the target asset allocation percentage and added expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the target asset allocation as of June 30, 2017 are summarized in the following table:

<table>
<thead>
<tr>
<th>Asset Class</th>
<th>Assumed Asset Allocation</th>
<th>Long-Term * Expected Real Rate of Return</th>
</tr>
</thead>
<tbody>
<tr>
<td>All U.S. Domestic Stock</td>
<td>50.00%</td>
<td>7.795%</td>
</tr>
<tr>
<td>Long-Term Corporate Bonds</td>
<td>50.00%</td>
<td>5.295%</td>
</tr>
<tr>
<td>Total</td>
<td>100.00%</td>
<td></td>
</tr>
</tbody>
</table>

*30-year geometric average
Discount Rate

The discount rate used to measure the total OPEB liability was 6.00%. The projection of cash flows used to determine the discount rate assumed that District contributions will be made on an ad hoc basis, but in an amount sufficient to fully fund the obligation over a period of time not to exceed 30 years. Based on those assumptions, the OPEB plan’s fiduciary net position was projected to be available to make all projected future benefit payments of current plan members over a period not to exceed 30 years. Therefore, the long-term assumed investment rate of return was applied to a period not to exceed 30 years of projected benefit payments to determine the total OPEB liability.

Sensitivity of the District’s Net OPEB Liability to Changes in the Discount Rate

The following presents the net OPEB liability of the District, as well as what the net OPEB liability would be if it were calculated using a discount rate that is 1 percentage-point lower or 1 percentage-point higher than the current rate:

<table>
<thead>
<tr>
<th>Discount Rate –1% (5.00%)</th>
<th>Current Discount Rate (6.00%)</th>
<th>Discount Rate +1% (7.00%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Net OPEB liability</td>
<td>$ 1,998,820</td>
<td>$ 1,405,197</td>
</tr>
</tbody>
</table>

Sensitivity of the District’s Net OPEB Liability to Changes in the Healthcare Cost Trend Rates

The following presents the net OPEB liability of the District, as well as what the net OPEB liability would be if it were calculated using a healthcare cost trend rate that is 1 percentage-point lower or 1 percentage-point higher than the current rate:

<table>
<thead>
<tr>
<th>Discount Rate –1% (3.00%)</th>
<th>Current Discount Rate (4.00%)</th>
<th>Discount Rate +1% (5.00%)</th>
