Multimedia exhibit in gallery until Wednesday

Continued from Page 1

all feels like it ties together and highlights the multifaceted interests that the faculty have."

Tzur contributed two projects to the exhibit: "Cherub Watching at Lakeside Park" and "Reenactments of a Happy Woman in Relationship."

"Cherub" is a performance piece built around a constructed reality in which cherubs exist in nature. It includes a looped video of a group of "cherub-watchers" observing the creatures in their natural habitat.

"Reenactments" is made up of a succession of staged images of the artist and a collaborator posing as a happy couple. According to Tzur's website,

she "searched 'woman in relationship' on Google Images, and reenacted the images and common themes. I then manipulated them with Photoshop to create compositions."

Also featured in the exhibit is a selection of highly-focused photos of small insects by David Folker.

"The pictures depict these creatures that we rarely look at up-close, and looking at them like this really lets their personality come through," Rubiolo said.

A reception was held for the artists on Friday at the gallery. Coming up, The Annual Juried Student Awards Exhibition will take place at the gallery from April 11 through May 13.

ACE train derails

Continued from Page 1

killed, Sheriff's Sgt. Ray Kelly told the Associated Press.

The accident and closing of Niles Canyon Road caused more traffic and even longer commutes. Ohlone student Katie Anderson's commute to the Newark campus from Livermore via Route 84 was doubled.

"By the time I got to Newark it wasn't even worth going to my first class, I was so late," said Anderson, a graphic designer for the Monitor.

The car that plummeted into the lake has an estimated value of \$2 million to \$2.5 million. ACE officials are hoping to repair the car, because it is more time- and cost-effective than buying a new car.

ACE train officials announced that they were looking into getting motion sensor detectors that would detect debris on the tracks. This type of technology could prevent accidents like the one that occurred Monday night.

Memorial service for Griffin

MONITOR STAFF

Ohlone will celebrate Hal Griffin's life on Wednesday afternoon on the Fremont campus.

Griffin, who worked at Ohlone from 2000 to 2009, died Feb. 9 at the age of 76. He was a popular figure on campus, known for his skill

with the ukulele and yo-yo, and as a dedicated follower of the men's basketball team.

Employees can share their thoughts and fondest memories of Griffin with his wife and family at 2:30 p.m. in Building 19, Conference Room B.

RSVP for the event at www.surveymonkey.com/r/NGX9FJQ.

APASA registers marrow, stem cell donors

MONITOR STAFF

The Asian Pacific American Student Association will continue to register bone marrow and stem cell donors today at Hyman Hall on the Fremont campus.

APASA partnered with the Asian American Donor Program for the registration, which will be from 10 a.m. to 3 p.m. outside Hyman Hall or, if it's raining, in the Hyman Hall lobby. The group also registered donors on Wednesday.

There is a critical need for

donors from Asian, South Asian, Pacific Islander, African-American, Latino, Native American, and multi-racial backgrounds, so the National Marrow Donor Program paid the Asian American Donor Program to encourage more members of those ethnic groups to join the Donor Registry.

The AADP is dedicated to helping save the lives of patients with life-threatening blood diseases such as leukemia and lymphoma, which are curable by a stem-cell transplant.

Those registering will provide a cheek swab sample, from which the AADP can obtain a "tissue type" or HLA type. Ethnicity is one of the key factors that determine whether a donor marrow match can be made.

To register, prospective donors will need to submit a short health history, driver's license or Social Security number, and the names, telephone numbers and email addresses of two friends or relatives. All information is confidential.

For more information, go

to www.aadp.org or www.marrow.org, or contact the APASA at ohlone.apasa@gmail.com.

Corrections

A Feb. 11 story about students headed to Denver to compete in the Irene Ryan Scholarship Auditions gave the incorrect age for Idrees Najibi. He is 24. The same story used the wrong stage name for one of the students. He is Amir Hasan.

PUZZLES BY OHLONE STUDENT NADIA BUDIMAN

In an effort to make our Sudoku even more challenging (or perhaps because we simply forgot), we ran the solution but not the puzzle last week. Here is last week's puzzle along with a new one. The solutions are (we promise) on Page 7.
