

CURRICULUM GUIDE 2019-2020

BIOLOGY

Associate in Science in Biology

The Associate in Science in Biology offered by Ohlone College is designed to prepare students for studying the Biological Sciences at most universities. The core courses required in the Associate in Science in Biology will fulfill the lower division requirements for most campuses of the UC and CSU systems. This program will enable students to develop a strong foundation in the life sciences, physical sciences, and mathematics. Furthermore, the theoretical knowledge and laboratory skills acquired by students in this program will also enhance their success with obtaining entry-level jobs that require two years of college-level science and math.

Since some curriculum requirements may vary among transfer universities, it is imperative that students entering Ohlone's Associate in Science degree program in Biology meet with a counselor at the start of their academic work. Counselors will assist students in preparing a comprehensive Student Education Plan that will prepare them to transfer to the university of their choice. Counselors will also advise students on the general education plan that best prepares them for future transfer.

Requirements for Associate in Science Degree:

- a) Complete Major Field courses with a grade of C or better.
- b) Complete Ohlone College General Education (Plan A), CSU GE (Plan B), or IGETC (Plan C) requirements. These requirements are specified in the Ohlone College catalog.
- c) Complete at least 60 degree-applicable units with a 2.0 grade point average.
- d) Complete at least 12 units at Ohlone College.
- e) Complete either BIOL-101A or BIOL-101B at Ohlone College.

Student Learning Outcomes

1. Demonstrate an understanding of the scientific method through the performance of experiments and the subsequent analysis of the experimentally obtained data.
2. Demonstrate the correct operating procedures in the use of common lab equipment such as compound and dissecting microscopes, spectrophotometers, pH meter, electrophoresis gel apparatus, micropipettes, and centrifuges.
3. Explain and evaluate the major scientific themes in biology, chemistry, and physics.
4. Explain and evaluate the main concepts of modern evolutionary theory.

MAJOR FIELD

BIOL-101A	Principles of Biology - Molecular and Cellular Biology	5
BIOL-101B	Principles of Biology - Organisms and Systems	5
CHEM-101A	General Chemistry	5
CHEM-101B	General Chemistry	5
CHEM-112A	Organic Chemistry	5
CHEM-112B	Organic Chemistry	5
MATH-101A	Calculus with Analytic Geometry	5
PHYS-120	Introduction to Physics I	4
PHYS-121	Introduction to Physics II	4
	Total Required Units:	43
