

## VoiceThread Advanced Skills

In this workshop, participants will learn about more advanced VoiceThread features. We will demonstrate how to integrate Google Drive content via our Media Sources, how to change language displays, adjust playback settings and more. Portions of the workshop will be hands-on.

Tuesday, September 22, 2020 - 4:00 PM – [Register Here](#)

## VoiceThread : Humanize Your Online Course with VoiceThread

Creating engaging online courses is not easy. In many discussion-board based courses, students feel isolated and disconnected from their instructors and classmates. VoiceThread bridges the gaps in social presence typically found in online courses. In this workshop, educators will learn how to establish a social presence and connect with their students using VoiceThread to improve course satisfaction and student learning. We will cover all of the basic VoiceThread features, demonstrate how everything works in Canvas, showcase a variety of examples from actual courses, and have an open Q&A throughout the training.

Wednesday, September 23, 2020 12:00 pm – [Register Here](#)

## Notes from Mary

Wow – what a summer! It was my privilege and pleasure to meet and interact with each and every one of you during MQT. You will have stories to tell and moments to laugh about but I am confident that you are ready to “ignite, excite, and motivate” your students toward achieving their learning goals.

Take time to enjoy the ride. Stop by to share your accomplishments! We will continue to hold office hours the next two weeks. Make It Take It and webinar sessions will return in mid-September as well as Show and Tell (and yeeessss – prizes!). Also, watch for announcements as we begin offering local versions of the CVC-OEI courses.

Wishing you all the best! And thank you to all of those who took a moment to recognize the eCampus team contribution. The honor is warmly and humbly received! Your energy, dedication, and professional attitude make our role easier, richer, and worthwhile.

Working with you this summer has been like a picnic on a summer afternoon (without all of the ants and E coli, that is!)
