

Ohlone Starfish

Overview for Instructional Faculty

Starfish allows faculty to communicate with students.

Progress Surveys:

- 2 surveys will go out each term asking faculty to identify students of concern
- Faculty will receive email notifications when the surveys open & before they close
- Surveys remain open for a couple of weeks

Student Success Features

Other Starfish features such as alerts, kudos, and referrals exist to improve student success and can be used at any point in the semester to communicate with students or refer students to support services.

Alerts, Kudos & Referrals

- 6 Alerts: Attendance Concern, Missing/Late Assignments Concern, Low Performance, Participation Concern, In Danger of Failing and Behavioral Concern.
 - Use the first five alerts to communicate with students on their progress in a course and help get them back on track.
 - The “Behavioral Concern” alert **does not go to the student**. Instead, a member of the Counseling Department is notified and will outreach to the student as needed.
 - Faculty are able to add individual comments to any auto-generated email notification to give students specific information on what they need to change to get back on track.
- 3 Kudos: Keep Up the Good Work, Outstanding Academic Performance, and Showing Improvement
 - Faculty can raise kudos to recognize students who are performing well in a course.
 - Faculty are able to add individual comments to any auto-generated email notification to make the student recognition more meaningful.
- 3 Referrals: counseling, tutoring and financial aid
 - Faculty may make student referrals to support services as needed. The Counseling Department will contact students for all referrals made to counseling. However, all other service referrals provide general information about the service and require the student to initiate contact with the service area.

How to Access Starfish Using Your WebAdvisor Login

- From the WebAdvisor homepage: you will see a “Starfish” link at the bottom left corner of the screen, click “Starfish” to open the program
- From the Canvas “courses” tab: Click “Starfish” at the bottom of the menu bar
- See screen shots on the back of this document for both of these paths

Resources and Support

Welcome Guest!

Welcome to Ohlone College's online Community

WebAdvisor gives students and faculty access to our databases. As a member of the general public you can apply for admission, financial aid, set up a free online account to access our services and view the online Class Schedule via the links at the bottom of the page.

Students and faculty may access their records by logging in at the TOP of this page and then selecting either the Student or Faculty portal to the right.

Settings

Course modules let you organize your assignments, pages, files, etc. into smaller sections or units. Modules could be centered around a theme, focused on a specific topic, or even just grouped chronologically.

You can also sequence modules by defining criteria and prerequisites for each module. Students won't be able to access modules until they have unlocked all their prerequisites. That way you can prevent students from accessing certain content or files until they have, say, gotten at least 75% on a review quiz.

To start organizing your course into modules, click the "Add a New Module" button to the right.
